10. ☑ Other: <u>See attached</u>					

Continuation of 2. NOTE: Applicants have amended claims 45 and 48, this amendment requires further consideration by the examiner since Applicant's have changed the scope of these methods. In particular, Applicant's amendment would potentially raise new issues under 35 USC § 112, 1st paragraph for lack of enablement of claim 45, for example, since Applicant's specification does not indicate wha particular "portions" of the amino acid residues 222-501 of TRAF2 would be required to screen for a ligand, wherein said ligand is capable of either inhibiting or increasing, two distinct activities, the cellular activity which is changed or mediated by TRAF2. It is noted that claim 45 is not limited to wherein TRAF2 functions to inhibit or increase the activity of NF-κB, the cellular activity recited in claim 45 is not defined, therefore one of ordinary skill in the art would not know what cellular activities to assay for, other than for examining the activity o NF-κB.

Continuation of 3. Applicant's reply has overcome the following rejection(s): the rejection of claims 45-48 and 64 under 35 USC § 112, 2nd paragraph.
